

**High performance electric forklift  
with enclosed front wheel  
AC motor drive**

**5 adjustable working programs**

**Jungheinrich Curve Control  
for safer driving and cornering**

**Automatic parking brake**

**Maintenance-free multiple disc brakes**

## **EFG 535–550**

### **Electric four-wheel forklift truck (3500, 4000, 4500 and 4990 kg)**

With exceptional travel and lift speeds plus excellent acceleration and climbing ability, the EFG 535–550 achieve high throughput efficiency and fast work cycles – in inside as well as outside applications. Encapsulated motors ensure that the trucks are fully operational even in difficult environments, such as heavy dust, chemicals or moisture. This makes the EFG 535–550 suitable for any application.

Of course, there is also a contribution by the emission-free and quiet drive motor that can be integrated into any working environment.

Due to three-phase AC technology, there are many possibilities and advantages in the application of electric fork lifts:

- Excellent performance values for acceleration, travel and lift speeds allow for maximum productivity.
- Longer operating times through optimum efficiency and more effective energy regeneration.
- Precise traction control and wear-free regenerative braking with the energy being fed back into the battery on releasing the drive pedal.
- Maintenance and wear-free three-phase AC motors without brushes.

The result: faster work cycles at considerably longer operating times with one battery charge. Together with reduced service costs, this ensures high performance efficiency through low operating costs.

# EFG 535–550

## Capacity

 3) 45 VDI working cycles/h

# Make use of the advantages

## Superior operator comfort

Functionality and ergonomics of the driver environment guarantees relaxed, fatigue-free work over long shifts:

- Low access step and large, level foot well with automotive pedal lay-out.
- Steering column and comfort seat allow multiple adjustments for optimum seating position.
- Floating Cab module cushions road shocks and vibrations.
- Clear view: mast and fork carriage allow for excellent visibility to load and road.
- Hydraulic power steering is precise and low effort without kick-back.

SOLO-PILOT

- Comfort Display provides up-to-date information on vital vehicle conditions at a glance.
- Comfortable, fatigue-free operation of direction and hydraulics by SOLO-PILOT or MULTI-PILOT (optional).
- Numerous storage facilities for the operators belongings, e.g. cup holder.

## Safe, wear free braking – parking brake with automatic operation

Three braking systems ensure safe, precise and virtually wear-free braking:

- Regenerative electric braking in reversing mode and regular brake pedal use.

MULTI-PILOT

- Multiple oil disc brakes act as a safety back-up. Wear-free and fully enclosed.
- The parking brake is electronically operated through spring accumulation. It automatically engages when the forklift is stationary and releases again when the truck starts to drive. This way any uncontrolled rolling of the truck can be eliminated.

## Maintenance-free electric motors

Drive, hydraulic pump and steering motors are consistently equipped with proven AC technology. The advantages:

- High torque for rapid work cycles.
- Up to 15% higher energy efficiency than shunt-wound motors.
- No maintenance costs through omission of brushes and collector.
- Enclosed construction ensures long life even under dusty and damp conditions.
- 2-year warranty.

## Active safety

Excellent drive dynamics and performance also demand a high degree of safety:

- Jungheinrich Curve Control automatically reduces travel speed when cornering.
- Automatic parking brake ensures controlled operation on ramps and slopes.
- Increased stability and residual capacity through very low centre of gravity.

- Long wheelbase ensures stable handling and smooth travel.
- Electronic and hydraulic overload protection guard.
- Quickly accessible emergency cut off switch.
- Reliable data transfer between electronic components through CAN-Bus technology.

## Intelligent electronics

Comfort Display

BoardControl electronic system permanently controls and monitors all truck functions:

- Smooth driving, dynamic reversing and precise load positioning with a minimum of energy.
- 5 application programs can be individually adapted to ensure optimal performance in any application.
- Diagnostic system monitors all components and provides service data memory for rapid and cost-effective maintenance.
- Comfort Display with digital service hour meter, battery discharge indicator plus lift cut-out, clock, error code and warning displays.
- Electronic steer wheel position indicator.
